MICHELIN CRUISER RANGE

RECOMMENDATION FOR USE

PRESSURE

- Follow the tyre pressures recommended by the bike manufacturer.
- Check the tyre pressure when cold (tyres that have not been used for at least 2 hours or that have been used for less than 2 miles at low speeds) once a month and before long trips.
- If the pressure is checked when tyres are hot following use, increase the pressure recommended when cold by 0.3 bar.
- Never release air from a tyre that is hot; it will be underinflated when it cools.
- Always refit the valve cap after checking tyre pressure.
- Inflating with nitrogen does not mean that pressure checks are no longer required.

CHECKS

- Over-inflation, under-inflation or vehicle overloading can cause handling issues, premature wear or irreversible catastrophic damage in the most extreme cases.
- Take the opportunity when carrying out pressure checks to examine the condition of the tread area and sidewalls (level of wear, cuts, trapped stones and/or deformation).

NEW

MICHELIN COMMANDER III TOURING

The newest MICHELIN tire for all types of Touring bikes

- › The MICHELIN® Commander® III tire is designed to deliver even more unmatched durability than the MICHELIN® Commander® II tire.
- › The MICHELIN® Commander® III Touring tire is designed to go the distance for Baggers with enhanced wet grip and longevity that exceeds its predecessor thanks to new tread compounds.

NEW

MICHELIN COMMANDER III CRUISER

The newest MICHELIN tire for all types of V-Twin Cruiser

- › The MICHELIN® Commander® III tire is designed to deliver even more unmatched durability than the MICHELIN® Commander® II tire.
- › The MICHELIN® Commander® III tire is designed to go the distance with enhanced wet grip and longevity that exceeds its predecessor thanks to new tread compounds.

SAFE, DURABLE & PREMIUM STYLE RIDES

MICHELIN COMMANDER II

Michelin's solution
for all types of cruisers

- › Life expectancy of the rear tyre is up to 25,000 miles*
- › Excellent handling and feedback
- › Grip on both wet and dry surfaces thanks to its longitudinal tread pattern

* Tests conducted by Texas Test Fleet in 2011 on public roads, in sizes 130/80B 17 (Front) and 180/65B16 (Rear). Individual results may vary depending on motorcycle type and operating conditions.

MICHELIN SCORCHER :
The original equipment for Harley-Davidson®

- › Co-developed, homologated and branded by Harley-Davidson®
- › Excellent grip on wet surfaces

MICHELIN SCORCHER® 11

The MICHELIN radial tyre developed exclusively for the Harley-Davidson®

- › V-Rod®, Sportster®, Fat Boy®
- › and all the Street models.

MICHELIN SCORCHER® 21

Radial tyres co-developed with Harley-Davidson® specifically for the new Street Rod® model.

MICHELIN SCORCHER® 31

A range recently approved for the Harley-Davidson®

- › Electra Glide, Road Glide, Street Glide, Sport Glide, Low Rider S
